

Inclusions on all Flair Showers

All Flair Showers have the following inclusions as standard:

- Free Standing Base with Levelling Pads
- 12mm Ply Reinforced Walls
- Front Step/Hob Reinforced to Base to add to the strength and rigidity
- Stainless Steel Curtain Rail (Sturdy 1.2mm thick) Screwed into 12mm Ply with Stainless Steel Screws
- Shower Waste Outlet (Waste Hole in shower drilled unless specified otherwise)
- 12 Month Warranty

Features and Benefits of a Flair Shower

Free Standing

- No mortar required – making installation quick and easy
- Ply reinforced based secured to front step/hob to extra stability and strength
- Sits level on level floor
- Can be removed easily without damaging the cubicle to be re-sold/re-used elsewhere
- Guaranteed not to fail - proven it works as we've never had a base crack in over twenty years
- Can be glued to floor

One piece construction

- Fully moulded – Leak Proof
- Easy maintenance/cleaning (no grout like tiles)
- Range of sizes and styles made to fit through standard doorways

Two piece construction

- When you want a larger shower but your access to where it will be installed is an issue
- Can be dismantled to fit through existing doorways/hallways

- Shower supplied with the wall and base bolted together with stainless steel screws – means you only have to dismantle once to get the cubicle in place and you can be sure the two line up and fit together as they should
- Silicone seal from behind (when installed) to ensure water-tight seal and reduce mould growth

Many styles and sizes available

- Not just sizes but different styles in the same size – high step Rachelle vs low step Marianne vs taller Rebecca

Easy Clean

- Non Porous Surface – Wipe Clean
- Any non-abrasive cleaner can be used
- No Scrubbing Required
- No Grout

Raised Bases

- Redirect waste under shower to existing waste outlet or through adjoining wall
- No cutting of existing concrete slab required
- Adjustable height
- Choose flexi-waste or micro trap

Fixing Flanges around the Edges

- Easily secure the cubicle to stud work/wall and cover with matching trim in room
- No need to batten edges reducing install time

Moulded Soap/Shampoo Shelf

- No need for unsightly shower caddies that encourage mould growth and build-up of soap scum
- Stainless Steel Shelves can be Factory Fitted

Moulded Seats

- Moulded Fibreglass Cubicles with Seats are Strong, Stable and easy to clean
- Suitable for older/disabled people
- Can add a factory fitted Fold Up Seat with Ply Reinforcing to all other models

Moulded Footrests

- Safely stand on one foot in the shower to shave/wash legs/feet
- Can add a factory fitted Footrest to all other models

Factory Fitted Options Available

- Choose from many quality fixtures and fittings
- All Fixtures and Fittings including Screens are secured through Fibreglass into 12mm Ply
- Saves time as when you pick up your shower it can be ready to connect when installing
- Saves time and money on site with other trades - reducing risk for damage to occur as no drilling or hole sawing required by tradesman inside shower

Side Wall Fitted in Factory

- Reduce install time
- Save space in small bathrooms
- Can be fitted over plumbing in case you need access (peace of mind if plumbing leaks were to occur)
- Unique feature that no one else offers

Added strength/Reinforcing

- Fibreglass encapsulated ply/cardboard or core mat used where needed
- Plumbing fitted through the ply reinforcing
- Not flimsy or light

Use of Quality Materials

- Built to last
- Best practise used in all aspects of manufacture

Repairable

- Easily repairable if accidental damage occurs
- After years of harsh use, the gelcoat surface can be refurbished with a cut and polish to restore to as-new condition

Manufactured in Australia

- Warranty - If damage is to occur we work with you to resolve
- We Strive to deliver a quality product
- Supporting family owned and operated Australian small business
- Experienced staff who care
